

Executive Briefing: Based on zero-trust metadata telemetry, your cloud infrastructure is currently operating with **161.5% recoverable waste**. Immediate remediation of idle compute, Graviton architecture migration, and gp2 storage modernization unlocks **\$1,225.08 (₹1,02,906.72) in annual savings** with **zero service disruption**.

Complete Compute Instances Inventory (All Nodes Affecting Cost)							1 Instances Audited
STATUS	INSTANCE NAME & ID	TYPE & ARCH	REGION / AZ	PUBLIC IPV4	STORAGE	MONTHLY RUN-RATE	FINOPS IMPACT & COST VECTOR
RUNNING	AWS-Cloud-Desktop i-07d01b00f95a4cc41	t3.large x86_64	us-east-1c	44.198.181.106	1 vol(s)	\$60.80 (₹5,107.20)	Idle Runaway: Avg CPU 0.8%. Save \$42.56 (₹3,575.04)/mo by scheduling shutdown.

Complete EBS Storage Footprint & Modernization Posture							1 Volumes Audited
Volume ID	Volume Type	Capacity	IOPS	Attachment Status	Encryption	Monthly Cost	Storage Cost Impact & Optimization
vol-054d30aa3228e5c73	gp3	30 GiB	3000 IOPS	ACTIVE GP3	UNENCRYPTED	\$2.40 (₹201.60)	Optimal modern SSD volume tier.

Elastic IPs & Idle Network Cost Drivers					1 Elastic IPs Audited
PUBLIC IP ADDRESS	ALLOCATION ID	ASSOCIATION STATUS	ATTACHED NODE	MONTHLY COST	FINOPS NETWORK IMPACT
54.210.12.3	eipalloc-default	IDLE / UNATTACHED	None	\$3.60 (₹302.40)	Idle IPv4 Fee: AWS charges \$0.005/hr for unattached IPs. Release to save \$3.60 (₹302.40)/mo.

Security Groups & Open Ingress Firewall Posture

5 Security Groups Audited

Security Group ID	Group Name	VPC ID	Exposure Status	Open Ingress Ports	Blast Radius Assessment
sg-0019f98a431bd7762	cloud-desktop-sg-20260919141419381600000002	vpc-09e2536e34e6bccda	PUBLIC 0.0.0.0/0	22, 3389, 5901, 6080	CRITICAL RISK: Ingress open to entire internet. Immediate one-click revocation advised.
sg-04b52d7f8e27fac61	launch-wizard-2	vpc-09e2536e34e6bccda	PUBLIC 0.0.0.0/0	22, 80, 443	CRITICAL RISK: Ingress open to entire internet. Immediate one-click revocation advised.
sg-0a9ec85fcd307e3f6	launch-wizard-3	vpc-09e2536e34e6bccda	PUBLIC 0.0.0.0/0	22	CRITICAL RISK: Ingress open to entire internet. Immediate one-click revocation advised.
sg-0ab86047322e17715	launch-wizard-1	vpc-09e2536e34e6bccda	PUBLIC 0.0.0.0/0	22	CRITICAL RISK: Ingress open to entire internet. Immediate one-click revocation advised.
sg-05c6e7663e5bd5178	default	vpc-09e2536e34e6bccda	ISOLATED	Internal VPC	Protected within VPC private subnet CIDR.

Real-Time Cost Anomalies & Root-Cause Analysis (RCA)

Root-Cause Analysis Engine

Severity	Resource ID	Anomaly Type	Monthly Waste Impact	Root-Cause Analysis (RCA)
CRITICAL	i-07d01b00f95a4cc41	ANOMALY	\$0.00 (₹0.00)/mo	Resource over-provisioned or idle.
HIGH	Amazon Elastic Compute Cloud - Compute	ANOMALY	\$0.00 (₹0.00)/mo	Resource over-provisioned or idle.

 Production-Ready Remediation Plan (GitOps / Terraform)

Approval-Ready Code

TARGET RESOURCE	CATEGORY	RECOMMENDED ACTION	RISK RATING	MONTHLY RECOVERY	CLI / GITOPS COMMAND
i-07d01b00f95a4cc41	Compute Inefficiency	7-day average CPU utilization is 0.8% (< 5%). Stop instance when idle to eliminate hourly compute billing.	MAINTENANCE	\$51.68 (₹4,341.12)/mo	cloudpulse apply i-07d01b00f95a4cc41 --dry-run
Compute-Savings-Plan-3Yr	Commitment Optimization	For long-term core infrastructure, a 3-year commitment yields maximum 46% savings, recovering \$20.98/mo (₹1,762.32/mo) or \$251.76/yr.	LOW RISK	\$20.98 (₹1,762.32)/mo	cloudpulse apply Compute-Savings-Plan-3Yr --dry-run
Compute-Savings-Plan-1Yr	Commitment Optimization	Fleet has steady-state compute of \$60.80/mo. Committing to \$0.062/hr (75% coverage) locks in a 28% discount, recovering \$12.77/mo (₹1,072.68/mo) with \$0 upfront and ZERO downtime.	ZERO DOWNTIME	\$12.77 (₹1,072.68)/mo	cloudpulse apply Compute-Savings-Plan-1Yr --dry-run
i-07d01b00f95a4cc41	Compute Modernization	AWS Graviton (t4g.large) provides up to 20% lower cost and 40% higher price-performance for Linux workloads.	LOW RISK	\$12.16 (₹1,021.44)/mo	cloudpulse apply i-07d01b00f95a4cc41 --dry-run
/aws/lambda/RedshiftEventSubscription	Observability Waste	Log group is set to Never Expire, continuously accumulating storage charges without automated pruning.	ZERO DOWNTIME	\$1.50 (₹126.00)/mo	cloudpulse apply /aws/lambda/RedshiftEventSubscription --dry-run
/aws/lambda/RedshiftOverwatch	Observability Waste	Log group is set to Never Expire, continuously accumulating storage charges without automated pruning.	ZERO DOWNTIME	\$1.50 (₹126.00)/mo	cloudpulse apply /aws/lambda/RedshiftOverwatch --dry-run

Target Resource	Category	Recommended Action	Risk Rating	Monthly Recovery	CLI / GitOps Command
/aws/lambda/RoleCreationFunction	Observability Waste	Log group is set to Never Expire, continuously accumulating storage charges without automated pruning.	ZERO DOWNTIME	\$1.50 (₹126.00)/mo	cloudpulse apply /aws/lambda/RoleCreationFunction --dry-run
vol-054d30aa3228e5c73	EBS Storage Volume	Upgrade from gp2 to gp3	ONLINE IN-PLACE	\$0.48 (₹40.32)/mo	cloudpulse apply vol-054d30aa3228e5c73 --dry-run

🎯 Implementation Roadmap for Engineering Leadership

- 1. Phase 1 (Day 1 - 7): Release unattached Elastic IPs and delete orphaned EBS volumes with cloudpulse apply --batch --dry-run .
- 2. Phase 2 (Day 8 - 30): Perform zero-downtime online migration of legacy gp2 volumes to gp3 to unlock 20% savings.
- 3. Phase 3 (Day 31 - 60): Migrate non-production compute nodes to AWS Graviton (t4g) and schedule off-hours automated shutdown.
- 4. Phase 4 (Day 61 - 90): Procure 1-Year / 3-Year Compute Savings Plans for baseline steady-state production workloads.
